

Customer Profile

SKF ITALY *goes in live* with Infor XA Release 9.1

Prodotto: Infor XA

Settore: Manufacturing & Distribution

Paese: Italia

Twingroup Global Solutions, Infor partner, ERP service and World Class software distributor announced that RFT S.p.A., company of the Swedish group SKF, went in live with the release 9 of Infor XA on November 13, 2014. This project affected the Villanova d'Asti (AT) and Gazzada-Schianno (VA) plants.

SKF is a leader company worldwide for the bearings, mechatronics and lubrication systems and services, the service offer of the company includes technical support, maintenance service, engineering advice and education.

ABOUT SKF

SKF founded in Sweden in 1907 is an international group with almost 165 plants, more than 48 000 employees and it is 130 countries in every continent. RFT S.p.A. is a company of the Swedish group SKF and it is one of the biggest bearings, steel and rubber gaskets manufacturer in Italy with plants in Villanova d'Asti and Gazzada-Schianno (VA). It became an important point of reference for mechanical components and subcomponents manufacturers to which provides a big range of products. In Villanova d'Asti they produce more than 1000 with two different stamp technologies (compression and injection). In Gazzada – Schianno more than 400 items are realized with the compression CCM technology. To have more information: www.skf.it

MOVE TO THE LAST INFOR XA RELEASE

The migration to the new Infor XA release is part of a bigger innovation project that interested all the companies of SKF group that use Infor XA. RFT S.p.A. of SKF group is a Twingroup customer for Infor XA since 2002. In SKF the first implementation project has been done in 2000, in 2013, after years of collaboration and support, Twingroup has been appointed to support the migration to the new release of Infor XA for RFT Italian plants. The international project is part of a wider global technological renewal of SKF.

“We have dealt with the users training and we brought all the customizations of the old XA version into the new one, besides overhaul all company processes and new release 9 features.

The project has been realized in three months thanks to the active collaboration between Twingroup and SKF."

Gianni Lucarelli (Managing Partner Service Twingroup).

"The project seemed to be quite complex, because it was a 3 releases "jump" and because we might bring a lot of XA integration programs with other systems, especially with the stock management system. At the end of this project, I can state that there were not particular problems thanks to the high quality standard migration tools delivered by Infor and thanks to the Twingroup collaboration not only with SKF team but also with the other partner. About Twingroup I appreciated the professional approach and the capability to manage in short time some critical events during the non-standard programs adaptation phase".

Bruno Siciliano (Supply Chain Manager-RFT S.p.A.of SKF Group)

PROJECT RESULTS

The migration to the last Infor Xa release has been a success project for SKF group and for Twingroup. *"Thank's for a great job at SKF. I do believe we will work together in the future too".* These are the satisfaction words expressed by Kare Vikstrom, Infor Service Manager to Twingroup team.
