Arrange & Display Valuable Information the Way You Want

The Challenge

Infor's industry-leading ERP solution offers users access to critical product, customer and vendor information, as well as valuable financial and manufacturing data. But navigating the system to get to the information they want can sometimes be a daunting task for users.

The Infor Solution

Infor ERP XA Browser is the main window for all of your Infor Power Architecture applications. With Infor XA Browser — tailored to each individual's unique needs — users have an effective desktop environment from which they can easily access and view the information they're looking for across key Infor ERP XA ERP applications, including customer service, engineering, finance, inventory, procurement and production. With simple navigation, user-level customization, drag-and-drop arrangement of fields, attachments and "bookmarking," users increase their productivity without tying up limited IT resources.

Infor ERP XA Browser takes the valuable information in your system and lets the user arrange and display it the way they like. Whether it's traditional lists, tree structure overviews, or index "cards", Infor ERP XA Browser lets you arrange application information into multiple groupings and sequences that make sense to your individual needs. You can hide information that doesn't apply to your particular job or task. Arrange information by subset records to work with only the information that applies to the job you're currently performing. And customize information for individual users, groups of users or all users. The familiar interface means that learning to navigate through the system is easy and user-friendly. And you never need to worry about security. With Infor ERP XA Browser, you can secure the data as well as who can customize it. Simply set your security levels from strong centralized control to very decentralized control, depending on your needs. Not only does this give you peace of mind, it also reduces the workload of your IT team.

I discrete manufacturing

Infor takes pride in the 20 years of experience we have in the manufacturing industry. Using our deep base of industry knowledge and proven communications and planning applications, we help suppliers and manufacturers achieve their business goals.

We are passionately focused on providing comprehensive solutions that meet the unique challenges of the manufacturing industry on a global scale. Our solutions are comprehensive, open and modular, giving you the optimal choices to meet today's challenges and leverage tomorrow's opportunities.

Features

Intuitive Browser

Utilize intuitive list boxes, card files and icon-based tree structure views

Customized Views

Customize data views, subsets, sorts, cards and attributes by user

Point-and-Click Navigation

Use toolbars, pull-down menus, drop-down lists and push buttons to locate the information you need

Application Objects

Provides seamless integration to Infor XA ERP applications without compromising security of data in each application

Workbench

Open several different "task-related" windows of Infor XA ERP information, arrange them to your liking, then save the view for future use

History

Access complete navigation history of your session

Bookmarks

Lets you tag specific windows for easy access—from all Infor browser windows

Maintenance

Take advantage of templates, quick change, and mass change when combined with the appropriate underlying applications

Availability

Infor XA ERP Release 5 and higher

Requirements

Infor ERP XA Cross Application Support (CAS)
