Install & Manage Applications from One Central Location

Infor ERP XA Cross Application Support (CAS) is at the heart of Infor ERP XA, enabling you to install and manage various Infor ERP XA applications for all of your user groups from one central location. With extensive inquiry, reporting and maintenance functionality, Infor XA Cross Application Support helps you run your Infor ERP XA applications more efficiently, allowing you to create reports, control print output options, install new Infor ERP XA applications, restore data, set security and add users with one execution.

The Challenge

Manufacturers must use various applications to keep their operations running at the most efficient pace. From supply chain management applications to ERP solutions, organizations must support multiple users on multiple applications — an often daunting task for any IT department.

The Infor Solution

Infor ERP XA CAS allows you to control the installation, maintenance and management of software — including backups and restores, security per application and report outputs — from one location, saving time, money and unnecessary frustration.

Features

Inquiry

Review and maintain detailed status information for applications, jobs, data entry files, PTF (Program Temporary Fix), system control data and unattached jobs

Reports

Generate reports, including application log history, Infor ERP XA master file information, questionnaire results from install/tailor questionnaires, group job file listing, field data dictionary and field attributes

Maintenance

Maintain security for all Infor ERP XA applications, manage application information, monitor job queues, setup personal menus for each user, activate and deactivate interfaces, assign work station IDs, override system printer values, control printer override options, and manage menu, action and task functions

Backup and Recovery

Back up your valuable data or application library information to tape or disk. Retrieve and restore files from tape or disk. And reorganize master files to make disk space available

Install and Tailor

Install and tailor Infor ERP XA applications

I discrete manufacturing

Infor takes pride in the 20 years of experience we have in the manufacturing industry. Using our deep base of industry knowledge and proven communications and planning applications, we help suppliers and manufacturers achieve their business goals.

We are passionately focused on providing comprehensive solutions that meet the unique challenges of the manufacturing industry on a global scale. Our solutions are comprehensive, open and modular, giving you the optimal choices to meet today's challenges and leverage tomorrow's opportunities.

Extended Environment Support

Create, maintain, delete and list your library and environment information

Offline Loading

Edit and/or load offline files to master files

Multiple Currency Support

Display, maintain, synchronize and print exchange rate and currency information. Update alternate currencies to enable euro toggling

VAT and Sales Tax Support

View, maintain, archive or delete tax table, register and code information

EDI Functions

Activate, deactivate and maintain Electronic Data Interchange capabilities along with the associated EDI trading partners

Journal Management

Create, maintain and delete journal entries and journal receivers

Requirements

Infor XA Cross Application Support is included with your first installation of any Infor ERP XA application.
